Forwarding Trailer FT - 11

www.ryanengineering.ie

The RYAN FT-11 logging trailer is a versatile trailer for farm and forest. This 11 ton load capacity forwarding trailer is designed for forest owners who manage their own forest and appreciate quality and versatile equipment. The FT-11 is a uniquely adaptive trailer with a modular design, with many features and benefits.

Frames and headboard can be moved or completely dismantled to transform your FT-11 into a multi purpose trailer; flat bed trailer, bale trailer, dump trailer and more giving you exceptional value and versatility from one investment.

Also attachments available include: crane, winch, chassis extension unit, on-board PTO driven hydraulic system, brakes, lights, hydraulically powered wheels, wrap around tracks and others.

Hydraulically powered steering drawbar, which makes the trailer more manoeuvrable in tight turns and in difficult ground conditions.

Choice of wheel sizes to match your terrain type, resulting in better load stability.

Axel designed to maximize ground clearance, helping you to operate in difficult ground conditions.

Adjustable bogie axles can be moved to optimize the turning radius specific to your load size and forest conditions.

Twin beam chassis provide a stable platform for load transportation, helping you to move your cargo safely.
